

# Specialist Valves

**W**ithin this issue, we are featuring Avalco Ltd as a profiler for Specialist Valves Company of the Month. Avalco Ltd supplies a comprehensive range of solenoid valves to all types of industry throughout the UK. Based in Nuneaton and first established in 1996, Avalco has been in association with their manufacturer ODE Srl from the beginning, enabling the company to go from strength to strength.

ODE Srl design and produces complete lines of solenoid valves for machine and plant manufacturers, and through their designs they offer customised bespoke solutions in accordance to their fundamental principles of high quality, adaptability, product reliability and excellent after-sales service.

Avalco is proud of its Italian background and

their founder and Managing Director, Brian Ross states that, "Avalco focuses on its Italian working principles and we are proud to work with ODE Srl, a specialist within Italian manufacturing of solenoid valves. The ethos that we adhere to throughout our operation is to meet specific requirements of our customers, with a friendly efficient approach. We take pride in excelling in everything we do, so that our customers can too."

Manufacturer ODE Srl is one of the largest European manufacturers of solenoid valves. Ever expanding and developing, ODE has recently made further investment in new plant and equipment to accommodate the worldwide demand for their products. ODE Srl's products are renowned for reliability as all valves and coils are 100% tested. ODE Srl, are also ISO9001:2008, ISO 14001 and 18001:2007 certified.

With an extremely diverse customer range, Avalco produces an adaptable service for a range of industries. Through their range of products, Avalco

delivers a variety of solenoid valves through their selection of chemical, steam, air, water and vending products.

Clearly driven by the satisfaction of the customer, Avalco also provide a next day delivery service, in most circumstances, from their extensive range, completely manufactured in Italy by ODE Srl.

A few notable highlights for Avalco within the last couple of years, has been the expansion of their product range. ODE has recently developed

upon their range of servo-assisted solenoid valves, constantly updating and producing new products. They adapted to be able to supply 2 1/2" and 3" servo-assisted valves for use up to 5 bar and up to 15 bar with the high pressure versions.

In addition to their new developments, in February this year, Avalco was able to move to their new premises for their offices and warehouse. With this move of location, it has enabled Avalco to carry much larger quantities of stock.

Developing upon their success, Avalco are now promoting a note-worthy state-of-the-art product, their wireless system of valve controlling. With this new technology, industrial wireless devices produce an optimization process for production and give the consumer further freedom with the valve control and an additional hassle-free approach to cables/data collecting.

For any further information on the company's product range and service please feel free to visit their website, or to speak to them directly please call the number stated below.
